"Little Billy" Goes to Cleveland to Face Men Held There.

(Continued from First Page.)

all the chance I got to read signs until we got to Cleveland. I did not know it was Cleveland, and after we got in the house 'Jonesy' told me it was New-castle.

"When we got to 'Jonesy's' house he only had two rooms and lived upstairs. There were more stairs, and they said that up there was a lunatic asylum and I had to look out for crazy people.

"Once they said if I made any noise they would send me up to the lunatic asylum.

"On the door where he rapped was a figure two and Mrs. Jones opened it quickly. She was a nurse and dressed in nurse's clothes, with a white apron and a little cap. He said: 'Here is a little Jones for you,' and she asked how I was and took off my things.

Writes to Mother.
"Jonesy had to cook supper and he bought all the things and cooked everything while I was there. Nurses don't cook, and I was too tired even to eat much, and Mrs. Jones put me in the big bed. It seemed awfully long since I left school that morning.

"That day I wrote the letter to mother and told her I was safe and feeling well, and about the doctors and the hospital. Mrs. Jones always jerked me back when she saw me at the window, but every time I got a chance I would peep out of there when nobody was at the window. She said the doctor at the hospital was a rubber-neck, and would see me sure and send me to the pest house. But I saw a whole lot from the window."

Billy's descriptions here exactly fit the Granger apartment occupied by the two suspects in Cleveland.

"We had just the two rooms and I never left them from Thursday night until I went down to meet dad last Monday night.

"In the other room was the iron bed. There was a sink where I got under and hid every time there was a rap on the door for fear it was the doctors and so they could not find me.

"Every day I wrote to mother or to Aunt Buhl. Sometimes I just wrote what I wanted to and sometimes he told me things to write.

"Once I wrote that I was mad at daddy because he had not come to get me, but I was not mad. 'Jonesy' made me say that.

Sees His Picture.
"Mr. Jones brought in the papers. My own picture was in them and they showed them to me. I asked why and they said because I had escaped from the doctors and had smallpox. They would not let me read the papers.

"Mrs. Jones seemed to have light hair and sometimes talked funny, so I would think she was French or something. She was tall and not fat. She had awful red marks on her face and said in yface would be like that if I got smallpox at the pest house. She was always pretty nice to me."

It is believed that the woman painted her marks on her face as a disguise.

"Monday was the worst day of all. I felt awful, too, because dad had not

YOUNG MEN'S HAIR

STRONG REASONS WHY IT SHOULD BE CAREFULLY CARED FOR.

Baldness among young men is getting to be a serious industrial problem. In these days of keen competition when soulless, grasping corporations are demanding and getting the best, most vigorous and energetic men in the country, it is a well-known fact that young men have the preference, and that many corporations have made it a rule to retire employees at 45 and 50 years of age, and to replace them with younger and seemingly more vigorous men.

The baldheaded man at 35 nowadays will have just as hard a time finding a desirable job as the man of 50 with luxuriant hair.

For this reason alone, every man who cares anything for those dependent upon him should take care of his hair. Don't become bald or gray and old-looking at 35, or 40, or 50. Take care of your hair and you can better take care of your job.

If you have dandruff, look out. Your scalp is full of little germs, digging night and day into the roots of the hair, and destroying that vitality without which healthy hair is impossible.

Perhaps you will be glad to know that Henry Evans has a guarantee cure for dandruff called Parisian Sage, that will remove every trace of dandruff in two weeks or you can have your money back.

That's a pretty fair offer, isn't it? But let him go further and say that Parisian Sage is also guaranteed to stop falling hair, itching of the scalp, and to grow hair if the hair root be not dead.

And the ladies of Washington ought to know that a large percentage of the beautiful women of America are using Parisian Sage, because it is the most delightful, refreshing, and invigorating hair dressing made. It will quickly turn dull, lusterless, and lifeless hair into luxuriant, soft, and beautiful hair.

People who live in Washington are sure of getting Parisian Sage from Henry Evans, but in many towns cheap imitations similar in name are being offered for Parisian Sage. Look for the girl with the Auburn hair on every package.

TOO STARTLING TO PUBLISH

Several days ago we began the publication of announcements similar to those which appear at each end of this paragraph. It was our purpose then, and it is still our purpose, to always stand between the public and unreliable dentistry. The investigation we had but begun when first publishing our intention to put the true facts before the public, brought to light conditions so far beyond anything even we had anticipated that they proved

WE FOUND

a man practicing dentistry within the District without a license; a man practicing dentistry within the District whose fake "dental college" in another city was forced to close; a man practicing dentistry within the District who was indicted, convicted, and fined by the Grand Jury in another community for practicing without a license.

HERE IT IS

The great exposure of dental fakery and schemers by Washington's foremost dentists. We originated this idea to save Washington people from having their teeth ruined, and we keep our promise.

RED CROSS DENTAL OFFICE

939 Pa. Ave. N. W.

TOO STARTLING TO PUBLISH

So flagrant are many of these misdemeanors against all the laws of ethical dentistry that we leave the entire matter for the proper authorities to deal with as they see fit.

However, for the benefit of the public who have anxiously awaited these disclosures, we deem it a bounden duty to state that, among other facts which our rigid investigation revealed:

IF YOU VALUE YOUR TEETH, BEWARE OF DENTAL WORK BACKED BY SUCH METHODS

The same desire to protect the public that caused us to go to the great expense incident to this exposure will be found duplicated in our efforts to give the public the very best possible dental service at the least possible cost and in as painless a manner as the science of dental surgery has proven the most successful. In place of but recently graduated, experimenting operators, here you find only the most eminent dental surgeons, men who have made individual reputations, and who have joined our staff merely because of the broader field presented to them. That these straightforward methods are appreciated by the thinking public is proven by the large and ever increasing patronage with which we are continuously favored. The success that such methods have attained shall be maintained by continuing to serve the best interests of those who come to us concerning their teeth.
